The specification is objected to for being in poor form and grammatically wanting. For example, "A spindle structure for a ceramic faucet" is suggested for the title, and throughout the application. Correction is required. No new matter should be entered.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are in poor form and are grammatically wanting. There are numerous recitations without proper antecedent basis, such as "the external rim face" and "the protruded edge" in claim 1, lines 3-4. It is impossible to determine what is being claimed.

No comparison of the claims with the Prior Art can be made at this time in view of the informality of the claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The art cited shows various limit stops for faucets. A claim drawn to emphasize the combination of an adjustable stationary protrusion 604 and an adjustable rotating protrusion 702 is suggested.
